PLANT AND SOIL

International Journal of Plant Nutrition, Plant Chemistry, Soil Microbiology and Soil-borne Plant Diseases.

Revue internationale de nutrition des plantes, de chimie végétale, de microbiologie du sol et des maladies des plantes en rapport avec le sol.

Internationale Zeitschrift für Pflanzenernährung, Pflanzenchemie, Bodenmikrobiologie und bodenbedingte Pflanzenkrankheiten.

Issued under the auspices of the

"Koninklijk Genootschap voor Landbouwwetenschap"

(*Royal Netherlands Society of Agricultural Science*)

Executive Editors: D. I. Arnon, Berkeley; J. Baeyens, Louvain; E. G. Mulder, Wageningen; A. C. Schuffelen, Wageningen; F. Steenbjerg, Copenhagen; L. K. Wiersum, Haren.

Secretary: G. H. Arnold, Institute for Soil Fertility, Haren (Gr.), Netherlands.

Assistant Secretaries: J. K. Smit, Epe, and A. Houwers, Wageningen.

Consulting Editors; Wm. A. Albrecht, Columbia, Mo.; R. Brouwer, Utrecht; A. van Diest, Wageningen; W. Dijkshoorn, Wageningen; H. de Haan, Oosterzee; W. R. C. Handley, Oxford; J. L. Harley, Oxford; H. ten Have, Wageningen J. den Holder, Ghent; S. Larsen, Copenhagen; J. Lavollay, Paris; L. Leyton, Oxford; T. A. Lie, Wageningen; W. J. Lütjeharms, Bloemfontein; E. Melin, Uppsala; M. Ødelien, Ås; C. S. Piper, Adelaide; K. W. Smilde, Haren; D. Snow, Reading; H. G. Thornton, Harpenden, Herts.; F. W. Went, Reno.

The Editors are also advised by experts from the Staffs of the Institute for Soil Fertility, Haren and of the Department of Microbiology, Agricultural University, Wageningen.

Instructions to authors-1975 313

A. M. Abdel Wahab, *Short communication.* Nitrogen fixation by Bacillus strains isolated from the rhizosphere of *Ammophila arenaria* 703

Everardo Aceves-N., L. H. Stolzy and G. R. Mehuys, Effects of soil osmotic potential produced with two salt species on plant water potential, growth, and grain yield of wheat 619

G. C. Aggarwal and S. S. Prihar, *Short communication.* A simple technique to determine axial root growth force . . 485

Yaw Ahenkorah, Use of radio-active phosphorus in determining the efficiency of fertilizer utilization by cacao plantation 429

R. T. Besford, Effect of potassium nutrition on leaf protein concentrations and growth of young tomato plants. . . . 441

R. T. Besford and G. A. Maw, Effect of potassium nutrition on tomato plant growth and fruit development 395

J. L. Brewster, K. K. S. Bhat and P. H. Nye, The possibility of predicting solute uptake and plant growth response from independently measured soil and plant characteristics. II. The growth and uptake of onions in solutions of constant phosphate concentration 171

J. L. Brewster, K. K. S. Bhat and P. H. Nye, The possibility of predicting solute uptake and plant growth response from independently measured soil and plant characteristics. III. The growth and uptake of onions in a soil fertilised to different initial levels of phosphate and a comparison of the results with model predictions 197

NICOLE CATHALA et LOUIS SALSAC, Absorption du cuivre par les racines de mais (*Zea mays* L.) et de tournesol (*Helianthus annuus* L.) 65

R. L. COLMAN and ALEC LAZENBY, Effect of moisture on growth and nitrogen response by *Lolium perenne*. 1

I. S. CORNFORTH, The persistence of ethylene in aerobic soils 85

M. C. COWAN, *Short communication*. Observations on the leaching of nitrate, phosphate and potassium in soil colonized by fungi 711

R. N. CROSSETT, D. JOAN CAMPBELL and HELEN E. STEWART, Compensatory growth in cereal root systems 673

R. N. CROSSETT and D. JOAN CAMPBELL, The effects of ethylene in the root environment upon development of barley. . 453

R. VAN DEN DRIESSCHE and J. DANGERFIELD, Response of Douglas-fir seedlings to nitrate and ammonium nitrogen sources under various environmental conditions *M M* . 685

A. W. S. M. VAN EGERAAT, Changes in free ninhydrin-positive compounds of young pea plants as affected by different nutritional and environmental conditions 15

A. W. S. M. VAN EGERAAT, Exudation of ninhydrin-positive compounds by pea-seedling roots: a study of the sites of exudation and of the composition of the exudate 37

A. W. S. M. VAN EGERAAT, The growth of *Rhizobium leguminosarum* on the root surface and in the rhizosphere of pea seedlings in relation to root exudates 367

A. W. S. M. VAN EGERAAT, The possible role of homoserine in the development of *Rhizobium leguminosarum* in the rhizosphere of pea seedlings 381

J. N. ELOFF and F. W. PAULI, The extraction and electrophoretic fractionation or soil humic substances 413

M. A. ELRASHIDI, A. VAN DIEST and A. H. EL-DAMATY, Phosphorus determination in highly calcareous soils by the use of an anion exchange resin 273

M. N. El-Shourbagy and A. M. Ahmed, Responses of two varieties of tomato to abrupt and gradual short-period sodium chloride exposure 255

V. Fernando and G. R. Roberts, *Short communication.* Improvements in the method for the determination of ammonia volatilised from soil fertilized with urea 287

D. A. Forno, S. Yoshida and C. J. Asher, Zinc deficiency in rice I. Soil factors associated with the deficiency 537

D. A. Forno, C. J. Asher and S. Yoshida, Zinc deficiency in rice II. Studies on two varieties differing in susceptibility to zinc deficiency 551

Mohammed Garman and P. R. Hesse, *Short communication.* Cation exchange capacity of gypsic soils 477

K. G. Gupta, R. K. Sud, P. K. Aggarwal and J. C. Aggarwal, Effect of baygon (2-isopropoxyphenyl N-methylcarbamate) on some soil biological processes and its degradation by a *Pseudomonas* sp. 317

A. Jungk and S. A. Barber, Plant age and the phosphorus uptake characteristics of trimmed and untrimmed corn root systems. 227

A. J. Kempers, Determination of submicroquantities of plant-available phosphate in aqueous soil extracts. 423

C. A. Labandera and J. M. Vincent, Competition between an introduced strain and native Uruguayan strains of *Rhizobium trifolii* 327

J. Lee, R. R. Brooks, R. D. Reeves and C. R. Boswell, Soil factors controlling a New Zealand sepentine flora 153

Walter T. McDonough, Water potentials of *Salsola kali* L. at differing levels of substrate water availability 387

D. Merkel, H. H. Witt and A. Jungk, Effect of molybdenum on the catio-anion balance of tomato plants at different nitrogen nutrition 131

R. P. Mishra and S. N. Das, Attendant changes in the bacterial flora of rice rhizosphere as influenced by fertilizer treatment. 359

D. J. Mitchell and L. N. Shaw, Eradication of plant pathogenic fungi in soil and nursery potting mixtures with a mobile continuous soil pasteurizer 591

K. J. Mullette, *Short communication*. Stimulation of growth in Eucalyptus due to aluminium 495

S. Nagarajah, M. M. M. Jauffer and S. M. Willenberg, Timing of nitrogen application – its effect on nitrogen utilization and protein content of rice 349

P. K. Nayar, A. K. Misra and S. Patnaik, *Short communication*. Rapid microdetermination of silicon in rice plant. . 491

J. Navrot and A. Banin, *Short communication*. Tomato plant response to iron supply in various carrier forms 309

K. Németh, The effect of K fertilization and K removal by ryegrass in pot experiments on the K concentration of the soil solution of various soils 97

P. H. Nye, J. L. Brewster and K. K. S. Bhat, The possibility of predicting solute uptake and plant growth response from independently measured soil and plant characteristics. I. The theoretical basis of the experiments 161

James W. O'Leary, *Short communication*. High humidity overcomes lethal levels of salinity in hydroponically grown salt-sensitive plants 717

C. O. Plank, D. C. Martens and D. L. Hallock, Effect on soil application of fly ash chemical composition and yield of corn (*Zea mays* L.) and on chemical composition of displaced soil solutions 465

C. Ll. Powell, *Short communications*. Rushes and sedges are non-mycotrophic 481

K. P. Prabhakaran Nair and G. R. Rabu, Zinc-phosphorus-iron interaction studies in maize 517

Pratap v. Rangnekar, Effect of calcium deficiency on the carbon metabolism in photosynthesis and respiration of tomato leaf 565

I. Ravina and Z. Markus, The effect of high exchangeable potassium percentage on soil properties and plant growth . 661

R. Richter, W. Dijkshoorn and C. R. Vonk, Amino acids of barley plants in relation to nitrate, urea or ammonium nutrition 601

E. M. Romney, A. Wallace and G. V. Alexander, Responses of bush bean and barley to tin applied to soil and to solution culture 585

P. E. Russell and D. Gareth Jones, Immunofluorescence studies of selection of strains of R. *trifolii* by S 184 white clover (*T. repens* L.) 119

L. O. Safford, *Short communication.* Effect of manganese level in nutrient solution on growth and magnesium content of *Pinus radiata* seedlings 293

K. L. Sahrawat and Rajendra Prasad, *Short communication.* A rapid method for determination of nitrate, nitrite, and ammoniacal nitrogen in soils 305

C. Sonneveld and S. J. Voogt, Studies on the manganese uptake of lettuce on steam-sterilised glasshouse soils 49

G. M. Tichelaar and H. Vrugginк, A survey of fungi and actinomycetes colonizing the newly reclaimed soil of the polder Zuidelijk Flevoland 241

D. Thimma Reddy and A. Shiv Raj, Cobalt nutrition of groundnut in relation to growth and yield 145

Truong Dinh Phu, Nutrient requirements of planted European larch in Quebec. 109

W. R. Watts, *Short communication.* Air and soil temperature differences in controlled environments, as a consequence of high radiant flux densities and of day/night temperature changes 299

C. S. Weeraratne, *Short communication.* A simple instrument for soil perfusion 709

K. C. Willson, Studies on the mineral nutrition of tea. II – Nitrogen 501

Robert F. Wittwer, Albert L. Leaf and Donald H. Bickelhaupt, Biomass and chemical composition of fertilized and/or irrigated *Pinus resinosa* Ait. plantations . . . 629
